

Melodic Dictation Starter Cards

These started cards are great for practicing melodic dictation! Give the child a game board or a large grand staff printout and 3 tokens.

Show the child a starter card and have him copy the notes onto his grand staff. Then the teacher plays a three note sequence, using the two notes from the card and a third note which is either the same as the second note or up or down one step.

The child listens to the three note sequence and fills in the missing note on his game board or grand staff. Check his answer, play the melody again for him to hear and then play again with a new starter card.
