

# Scale Detective

Use this formula to uncover where the half steps lie in each scale below.

1. Look at the written notes and then color the keys on the keyboard image.
2. Check the whole and half step pattern that you see. Does it match the pattern you learned?

Once you've discovered where the half steps are, mark them with a slur. Identify the tonic (keynote) by drawing a whole note in the final measure of each line.
